HAND HELD ULTRASONIC Flow Meter

TUF 2000H

PORTABLE ULTRASONIC Flow Meter

TUF 2000P

WALL MOUNT ULTRASONIC Flow Meter

TUF 2000S

DESCRIPTION

Hand-held Ultrasonic Type

TUF-2000H works on the transit time method. This is based on the principle that sound waves traveling with the flow will move faster than those traveling against it. The resulting difference in transit time is directly proportional to the flow velocity of the liquid and consequently to the flow rate.

Portable Ultrasonic Type

TUF-2000P is available in a variety of configuration that permit the user to select an ultrasonic meter with feature suitable to meet particular application requirements. It could also provides the data printed service. Built-in min thermal printed with instant and timing print function and uplink over 20 measuring data to computer or internet.

Wall mounted Ultrasonic Type

TUF-2000S is a fixed mounted transit-time ultrasonic flowmeter, with clamp-on transducers for non-invasive liquid measurement. Our microprocessor based, user friendly, field programmable flow measurement technique allows no interruption of the process flow and has low installation cost.
